## What's New In AutoCAD?

Supporting references: AutoCAD 2023 Release Notes Use the %1 and %2 symbols (described below) to refer to the year and month of the current day, or to any previous year and month. The %1 symbol refers to the current year, and the %2 symbol refers to the current month. For example, the following statement uses the %1 and %2 symbols to display a date in the current month and year: %1/%2/20%3. Year: %1, Month: %2 Examples: %1/%2/20%3, %1/%2/20%4, or %1/%2/20%2%3%4 Quarter-to-quarter lines: New to AutoCAD 2023 is a feature called quarter-to-quarter lines. Quarter-to-quarter lines are great for creating a diagram that shows all the quarters of a year. Use the quarter-to-quarter lines tool to draw quarter lines and quarter markers. Select quarter lines, markers, or both. Then choose Quarter Marker, Quarter Line, or both, and select a format. The line will display the selected quarter markers and quarter lines. Marker data: New to AutoCAD 2023 is a feature called marker data. Marker data is a tool for adding dimension markers to a drawing. Choose Insert > Marker Data to open the Marker Data dialog box. In the Marker Data dialog box, choose one or more markers and styles from the Markers tab, and choose one or more markers and styles from the Styles tab. Click OK to insert the markers into the drawing. The markers display in a floating window. Choose Markers to access the Marker Data dialog box again. For more information about marker data, see The default marker data is Light Blue on Transparent. You can change the default marker data in the Options dialog box, or use the Marker Data dialog box to add custom marker data to a drawing. Roundtrip Data Export: When you import AutoCAD content from other CAD applications, the source data is displayed in the current drawing as rounded polygons. If you open a polyline in the current drawing with the Roundtrip Data tool, the polyline looks like an ellipse or semicircle. If you want the polyline to be displayed as a true straight line,
