Online services and Autodesk products 1 Introduction

At a fundamental level, AutoCAD is a CAD application. It uses block diagrams, such as pipes, boxes, and lines to represent a variety of geometric objects such as, for example, doors and windows. AutoCAD also has text-editing and drawing tools. AutoCAD is a desktop application, but since 2010 it has also been available as a mobile and web app. AutoCAD Mobile and AutoCAD Web are desktop applications that run on smartphones and tablets. They can be installed directly onto your mobile device or accessed from the web. In addition, AutoCAD Online is a cloud-based service, which enables you to use AutoCAD in the cloud on your desktop or laptop computer. You can also use the Online service on a tablet or smartphone. AutoCAD Online has the same capabilities as AutoCAD, but it is accessed using a web browser. Your data are stored

on Autodesk's servers and accessible from any device. AutoCAD Online requires a permanent internet connection. If your connection is interrupted, your data are lost. In addition, you are always connected to the internet, so you are vulnerable to hacking. For all these reasons, it is recommended that you use AutoCAD Online for larger projects
