AutoCAD History AutoCAD History The evolution of Autodesk's AutoCAD product line reflects the rapid expansion of the computer industry and, therefore, the demand for CAD software. During the 1980s, AutoCAD became the first widely adopted CAD program of its type. That success led to the development of four additional products, which combined to create the AutoCAD product family. Commencing in 1980, Autodesk's AutoCAD began a slow but steady growth in acceptance and popularity. The first CAD programs were not originally intended for desktop use. They were huge, expensive, and heavy. Users could only connect to mainframes or minicomputers. The CAD world was evolving rapidly, and the industry was in a transition from pre-digital to digital media. In 1981

Comparison to competitor software AutoCAD was originally based on Altair Graphics', an Altair monochrome bitmap graphics suite released in 1971, with the intention of providing it with the essential graphical features. In the following year, AutoCAD debuted in a multitasking version, integrating a command-line interface and an integrated development environment (IDE). The first open-source version of AutoCAD (AutoCAD LT) was based on the Allegro library. In 1993, the original version, which was released in 1984, was updated to AutoCAD LT v1.6, which was the first version to include a free and open-source "ISO-9001" licensed AutoCAD software package (previously, AutoCAD had been licensed under an early version of the Source Code Academic License). AutoCAD LT is still the current standard for open-source AutoCAD. It was the first open-source AutoCAD version in history. Since then, AutoCAD LT has been developed as a standalone product, and is in widespread use in the CAD industry. The original version of AutoCAD that was released in the 1980s was originally written in Code Vision and ObjectARX. In 2006, AutoCAD LT was forked to develop the second major open-source version of AutoCAD, AutoCAD LT v2.0, based on the QT toolkit (a cross-platform, C++ based GUI library). AutoCAD LT v2.0 is an ISO-9001 licensed AutoCAD package, and is the second oldest ISO-9001 licensed AutoCAD package after Autodesk Inventor. The first version of AutoCAD, which is now known as AutoCAD R2018, was released in September 2018, which is a continuation of the Autodesk Inventor v17, and was also an ISO-9001 certified AutoCAD package. AutoCAD LT has supported command line interfaces since version 2.0 and AutoCAD R2018 also supports command line interface since version 1.0, but the graphical user interfaces of the two products are vastly different. For the user interface, AutoCAD LT uses the QT toolkit, whereas AutoCAD R2018 uses the new Tk engine. AutoCAD LT v2.0 is now supported in the free Cadalyst Tk forum. Email: Q: VBA to delete additional rows, if 2 conditions are met I'm trying to adapt the below code to delete additional rows, only if the cell for that row meets 2 conditions. `.cells(s,5).value = "N/A" .cells(s,6).value = "N/A"` The below works fine if the cell meets only one condition: `.cells(s,5).value = "N/A" .cells(s,6).value = "N/A"` Any suggestions? A: You need to change your conditions to ensure you are only deleting rows if both conditions are met: `Sub Filter_Rows() Dim lastRow As Long Dim i As Long lastRow = Cells(Rows.Count, "E").End(xlUp).Row If lastRow > 2 Then For i = lastRow To 2 Step -1 If Cells(i, 5) = "N/A" And Cells(i, 6) = "N/A" Then Rows(i).EntireRow.Delete End If Next i End If End Sub` Jonas Amed Jensen Jonas Amed Jensen (12 June 1699 – 18 May 1757) was a Danish bookseller and politician.
