Most add-on applications are made in Visual LISP. In the AutoCAD Cracked 2022 Latest Version R14 release, a new API was introduced for Python developers. AutoLISP was removed from the system. AutoCAD can also be extended by ActiveX COM components. The AutoCAD COM API allows the integration of an AutoCAD Application (AutoCAD software) with other applications. In practice, Autodesk does not impose any major compatibility limitation on this API. AutoCAD supports the internationalized character sets in file names, files, etc., and these are supported in the COM API, although the encoding is a single UTF-16-LE by default. AutoCAD uses a common file format which allows interchange of AutoCAD files with other applications. The global file format is called DXF (Drawing Exchange Format). In addition to the DXF global file format, many other file formats exist to meet different needs. Some of the most popular file formats supported by AutoCAD are: DWF, DGN, PDF, DWG, DFX, DWT, DXF, DXFZ, XPS, VDA, SVG, PSD, CFX, etc. DXF is the most common type of DXF file, and is the global file format.
