select "Edit" Q: NullPointerException  
when creating class instance in android-  
extras I am trying to access an instance  
of the Camera service in Android-Extras  
( via reflection. I'm trying to do

---

something like the following

```
Object obj = Utils.class.newInstance(); Class cls = obj.getClass(); for (Method m : cls.getDeclaredMethods()) { m.setAccessible(true); //use method } It seems to be working fine, except that I keep getting a java.lang.NullPointerException at android.util.Log.println(Native Method) at co.zendesk.androidextras.utils.Utils.println(Utils.java:1241) I've tried running it on the emulator, and have noticed that it's not working at all on the emulator.
```

Am I doing something wrong, or is something up with the emulator? A: The emulators doesn't have the version of java running. Do you have the adt-bundl

e-windows-

x86\_64\sdk\tools\ant\build.xml file that they use to build the emulator, and has it in the directory of your workspace. I'm not sure if it is located in the same directory as your.java files. So if you have a.java file named android\_string.java with a println statement you might think you can do System.out.println(m.getName()) but that will fail. Anyway, if you have the ant file you can use it and it
