AutoCAD Crack With Serial Key

AutoCAD is a commercial 3D, 2D, and data visualisation and presentation CAD program, and, as such, is focused on creating 2D and 3D designs. It has several modes of operation (orthographic, parametric, drafting, 3D, rendering, presentation, and others), including a direct modeling and import/export feature for editing CAD models. The AutoCAD software interface includes functions for placing, drawing, modifying, editing, and printing. These functions interact to create and modify complex models. For example, when you place or draw a circle or line, you are also creating a circle, line, or closed polyline (depending on the placement or drawing method). You can easily create complex figures using a series of links and feature commands. An important and useful feature of the AutoCAD program is the ability to attach an external reference (also known as a master, model, or origin) to a model, which allows a program to determine where its viewing points are relative to the origin. This method enables you to view the figure in any orientation. In some cases, however, this feature can lead to some "unwanted" results, such as one object disappearing from view (either because of the angle it is at or the presence of other objects obscuring it). The feature can be used to make any sized object "float" in space or to make any object "be the centre of the universe". The user can also scale the model to any size using the scaling feature of the application. The application can export figures to a number of file formats, including AutoCAD DWG, DXF, IDWG, IGES, JT, KNA, PLY, and 3DS. The program also allows for import of figures from other CAD programs, including MSCAD, SolidWorks, and MAYA. The following is a list of third party applications for Windows, that use AutoCAD's native API to communicate with AutoCAD. AutoCAD-based applications AutoCAD MEP Application is a product created by AECOM. It uses the Autodesk API to automatically fill in MEP (metal, engineering, manufacturing) drawing parameters, generate an assembly drawing and populate "zones" in the assembly drawing. AutoCAD Architecture is a product created by AECOM. It uses the Autodesk API to automatically fill in architectural drawing parameters, generate a plan view drawing and populate "zones" in the plan view drawing. AutoCAD Electrical is a product created by AECOM. It uses the Autodesk API to automatically fill in electrical/electronic drawing parameters, generate a floor plan drawing and populate "zones" in the floor plan drawing. AutoCAD Civil 3D is a product created by AECOM. It uses the Autodesk API to automatically fill in civil engineering drawing parameters, generate a floor plan drawing and populate "zones" in the floor plan drawing. AutoCAD Mechanical is a product created by AECOM. It uses the Autodesk API to automatically fill in mechanical engineering drawing parameters, generate a 2D drawing and populate "zones" in the 2D drawing. AutoCAD 360 Architectural is a product created by AECOM. It uses the Autodesk API to automatically fill in architectural drawing parameters, generate a drawing and populate "zones" in the drawing. AutoCAD Electrical Designer is a product created by AECOM. It uses the Autodesk API to automatically fill in electrical/electronic drawing parameters, generate a floor plan drawing and populate "zones" in the floor plan drawing. AutoCAD Mechanical Designer is a product created by AECOM. It uses the Autodesk API to automatically fill in mechanical engineering drawing parameters, generate a 2D drawing and populate "zones" in the 2D drawing. AutoCAD Structural is a product created by AECOM. It uses the Autodesk API to automatically fill in structural engineering drawing parameters, generate a 2D drawing and populate "zones" in the 2D drawing. Customization While AutoCAD does not support every language, the following languages may be used to interface to AutoCAD: Application Program Interface (API) programming languages: C++, C#, 5b5f913d15
