## Immo Universal Decoding 3.5 ((BETTER))

### [Download](#)

It is compatible with G22, G27 and G29 ECU. IMMO Universal Decoding is compatible with G22, G27 and G29 ECU. In short, once the ECU is encrypted, the ECU is fixed automatically for an authorized user. However, you can also restore the ECU to the factory setting by using the encryption tool. The encryption tool of IMMO Universal Decoding decrypts the dummy encryption of ECU, such as Honda CRF250L for example. IMMO Universal Decoding can read the ECU blank file. The ECU blank file stores the memory setting in factory settings. If you have a PGM file or YD file, you can only use the system program to run the programs which are provided by the owners. You can download the IMMO from official site! After decrypted the dump file, the decrypted IMMO will be available. After encrypting the new ECU, it will be available to be decrypted and set correctly. IMMO Universal Decoding supports G22, G27 and G29. Honda CRF250L is one of the most popular bikes in the world. IMMO Universal Decoding is compatible with the following brands and models: Honda, Ducati, Yamaha, Kawasaki, Suzuki. You can also use the IMMO Universal Decoding to decrypt the ECU of the American bikes, such as: Yamaha XSR and Scrambler models, Honda Rebel, Honda CRF450 and CRF250L models, Kawasaki KZ750B models, and Suzuki DRZ400, DR-Z 400

---

and DR-Z 125 models. It requires the password and the key and can be used to decrypt the Honda CRF250L, CRF450, CRF250R and Cub 125. Advanced IMMO Recovery is a powerful IMMO cleaner which allows you to remove the IMMO lock on your vehicle. The software was originally developed to remove the IMMO lock from the Suzuki Samurai but now is also available on some older vehicles with Audi, BMW, Holden, Jaguar, Mercedes, Mini, Volvo, Volkswagen, Honda, SEAT, Nissan and Volvo. The IMMO code reading software is used with basic laptop computers, a portable programmer or a smart-phone, by using the built-in Bluetooth communication.

### **Immo Universal Decoding 3.5**

windows os: windows xp, windows vista, windows 7, windows 8, windows 8.1, windows 10  
cpu: intel/amd dual-core or higher

2021. ikomik is a tool for replacing the dcc module and, if applicable, tcc in a obd ii car. there are many other functions, e.g. to recover the previous fiat point system. in principle all functions can be performed using the diagnostic codes extracted from the obd port, but the cause of the immobilisation can be more easily determined that way. important note: the fiatpoint codeset that immo works with does not support eotd. the wds service also does not work, therefore the icm iv is required for anti-immobilisation. ikomik can not unlock a device that is locked via the immo command. therefore the immo command needs to be flushed in order to unlock the device. immo speaks obd interface and is thus compatible with obd2 cars. can i start my vehicle with a non-functioning dcc system? 5ec8ef588b
