
Pc Dmis 2015.1 Hasp 41

Download

pc-dmis uses the rs-232 or usb port for communications. the rs-232 port is typically located on the back of the cmm and has a configuration port that you can use to identify the correct port for a particular cmm. if you wish to change from the standard configuration rs-232 port to a usb port on the cmm, please contact your hexagon distributor. some cmm models are shipped with a usb cable that is wired to the rs-232 configuration port. if this is the case then simply use the usb cable to connect the cmm to a computer. some cmm models are shipped with a rs-232 cable that is wired to a proprietary port on the cmm. the cmm port should be able to be set to a standard configuration. if not, contact your hexagon distributor to identify an alternative. communications from pc-dmis are sent on the rs-232 and usb port depending on the cmm model. some cmm models use an rs-232 port and others use a usb port. ensure the cmm model you are using has the correct configuration port for communications. some manufacturers are phasing out the rs-232 port and only shipping with the usb port. if you wish to switch from an rs-232 port to a usb port, simply use the standard usb cable to connect the cmm to a computer. if you wish to switch from a usb port to an rs-232 port, you must contact your cmm manufacturer for a replacement cable. cad files are supported as long as they are in standard north american symbol (nas) file format: dxf, dwg, dwf, dgn or autocad(r) formats. also supported are 3mf files. you can download a cad file from the pc-dmis web site or directly into pc-dmis.* pc-dmis receives the cad file as a byte stream; therefore, pc-dmis cannot accept files larger than 1 gb. you can download files directly into pc-dmis from your computer and click 'create part' to build the part. alternatively, you can download a cad file from the pc-dmis web site and click 'open source part' to use the cad file directly.

Pc Dmis 2015.1 Hasp 41

with the new optional docking station, pc-dmis can be integrated with a pc, allowing for pc-dmis reports to be delivered from the hxgn platform in a more meaningful manner. this enables staff to view, print and save data directly from the hxgn platform. pc-dmis software is now fully aligned with dicom 3.0, allowing for medical and industrial inspection to easily integrate with the growing number of medical imaging systems such as mri and ct scanners, x-ray systems, ultrasound, etc. the industry standard for metrology software, pc-dmis software is widely used for analysis of work piece measurement data. pc-dmis software supports a variety of industry leading inspection protocols including semi e359-01, t&f e311-1 and iec 61340-5-1. pc-dmis is the only inspection software to satisfy the most stringent requirements set by the food and drug administration (fda) and other leading pharmaceutical and medical device companies. pc-dmis is the only inspection software to be fda 510(k) cleared and successfully completed a rigorous fda inspection in order to support its use on many pharmaceutical and medical devices. pc-dmis is a cost effective inspection solution that is easy to use, maintain and expand. pc-dmis software is available as single part inspection software for inspection of part attributes and as an integrated inspection solution for inspection of features. increased support for up to 25 parameters, including: re-use of the existing pc-dmis schema, which means it can be upgraded from the current pc-dmis 2016.0 release without having to modify existing code improved handling of metadata for multiple part variants ease of use for key users with work instructions that contain multiple properties 5ec8ef588b
