## Ultimate Skyrim Music Replacer !!!INSTALL!!!

first of all, if you're expecting a megaboob, forget it! this might totally ruin your experience of skyrim's incredible world, but it will let you add an incredible amount of character to your character. the more you add, the more powerful your character becomes - you can even choose to display different faces for different characters. in addition, you can create a character for any race in the game, with a black eyes hairstyle to match. extended enviromental scaling is the first plugin by arthmoor. it does one thing very well - it scales the world, map sizes and more with the help of a configuration file - skyrim.ini. just like anything else can do it, why it's the only option for modding? because it's simple and can be expanded to an unlimited amount of means; just be patient with it, make a real configuration that fits your needs and make your own edits to it. now, it's not recommended to use this with any other plugins or use (ultimate environmental scaling), or any 3rd party mods that adjust environment. the reason? there might be conflicts. old version of eses was obsolete, the newest version, as soon as it's released, will contain most of the scripts it needs to make it work with Bethesda's skyrim. other replacements are available for skyrim.ini, this makes it the best plugin for customization. easy to use and maintain. grasses, ferns, and shrubs have been modeled, and placed into the meshes. the result is a more alive, more natural and a much more beautiful environment in skyrim. this mod is one of the most customisable ones, of course, yet it retains the skyrim-feel we've all come to know and love. it also features a animated sun cycle without godrays (although these may be added in the future). there's no mod that will look and feel more natural than edenmodders use, but most of all - it's highly customizable, which allows you to assign different weather states to different vegetation patches (or similar).
