

Foison C24 Vinyl Cutter 14

hello, i have just received my foison c24 vinyl cutter and have tried to operate it, but it just won't do anything. have the cutting material loaded into the cutter, have the origin set to home and the material selected, but it just won't cut. the cutter lights up but there is no cutting action. if anyone has any ideas on what to do would be much appreciated. thanks in advance. the foison c24 vinyl cutter can cut a wide range of vinyls and flex. the foison c24 combines sleek design with exceptional performance. with bundled graphic design software the foison c24 is definitely a sign makers choice. a user friendly display allows the operator to quickly set the parameters of the cutter. the origin is easily set to save material. the test cut facility allows the operator to set the knife pressure prior to cutting. a stand is supplied with the cutter to allow easy movement of the material when cutting. we also supply the consumables. i have a foot switch, it controls a sensor that sends signals to the electronics. when i press the foot switch once, i get a signal from the sensor and the electronics turn on. when i press the foot switch a second time, the electronics turn off. when i press the foot switch a third time, i get a signal from the sensor and the electronics turn on and stay on. the fourth time i press the foot switch, i get a signal from the sensor and the electronics turn on and off. is this a problem in the electronics or the foot switch? this is the same with the sensors on the cutter. skycut model c vinyl cutter has cute body, but has industrial professional design with metal body. stronger, stable and higher accuracy. it has max 750g cutting force, easily cut many materials including vinyl, cardstock, htv, fabric, eva foam and more.

Foison C24 Vinyl Cutter 14

hi everyone, ive just purchased my first ever cutter a foison c24. i didnt have much money to play with! i have a problem. should i be able to see the cutter move up and down between jobs because the blade seems to be scoring the surface when it moves between letters. if i back it off so it doesnt mark the surface it wont cut the letters. apparently pressing the test button on the plotter itself should move the cutter up and down but it moves it very quickly from left to right the foison c24 vinyl cutter can cut a wide range of vinyls and flex. the foison c24 combines sleek design with exceptional performance. with bundled graphic design software the foison c24 is definitely a sign makers choice. a user friendly display allows the operator to quickly set the parameters of the cutter. the origin is easily set to save material. hi steve, ive got a secabo c120. this is the same machine. what you will find is that the software you are using isnt really compatible with the machine. the secabo came with flexi starter i couldnt get on with it anyway as im used to using easy sign. the drivers for the cutter is in that package. the guys at easy sign in the head office where really help full and help me out a treat. i was using the hgml setting which wasnt good enough. also are you using vista, if so get rid of it strait away as this also makes the cutter do the same thing you said, it cuts all over the place. i bought the package as vista compatible (is it hell) give us a ring 01726 76445. i have a old vc that had a motor problem, it did not have a new motor so i replaced it with another machine. both motors are same brand, same voltage, same rpm, same speed and the other machine cuts vinyl great but my problem is that if the vinyl is long it cuts the material so fast that it becomes thin and look like a tube. i have cut some 10 feet vinyl and its looks like a tube. so any idea why it cuts so fast 5ec8ef588b
